# Minot Public Library

## Children's Librarian, **Paulette Nelson**, was voted the North Dakota Library Association's Librarian of the Year

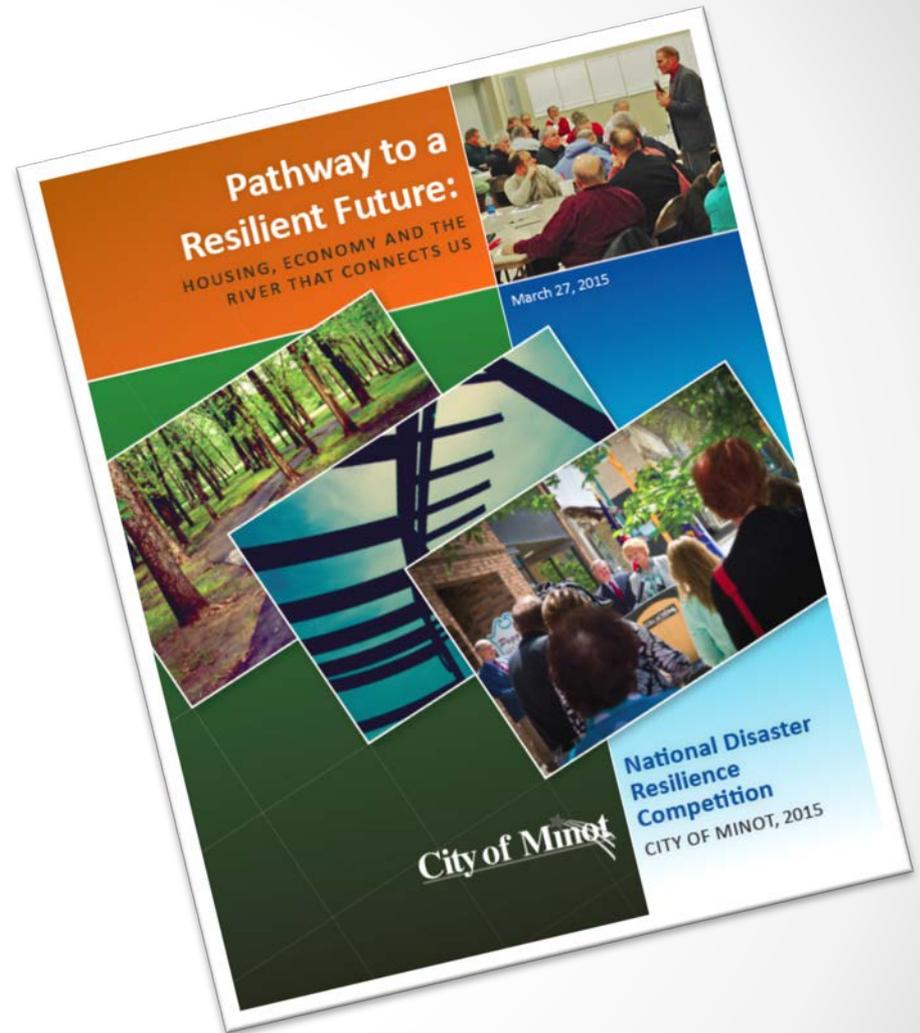

- *Paulette has been with the Minot Public Library for 36 years*
- *Nominations came in from all over North Dakota*

# Planning Department

## Phase II Resilience Application

- Film crew from Rockefeller Foundation was in Minot September 21-22 to film Minot's Resiliency efforts with design charrettes taking place with students from MSU and with volunteers within the region.
- The final public meetings will take place: in Room 201 in the Auditorium on Tuesday, October 6<sup>th</sup> from 6:30 PM to 8:00 PM & at Perkett Elementary School, Thursday, October 8<sup>th</sup> from 6:30 to 8:00 p.m.
- CRO and Finance Director will be attending the Funders Summit in Washington DC on October 6<sup>th</sup> to present the proposed project list as stated on the next slide.
- CRO will be attending Resilience Americorp Training in Houston, TX, October 21-23.

# Potential Projects for NDRC Funding

## Resiliency projects include:

- Flood Storage Areas, Buy-Out, Relocation & Buy-In
- Flood Resilient Open Space
- Souris River Flood Risk Reduction Alternatives  
Decision Tools
- Support redevelopment of flood diversion and storage areas for public open space restoration
- Foster Economic Resilience and Diversification

# City of Minot

## Flood Storage Areas, Buy-Out, Relocation & Buy-In

- The city will remove homes in the lowest lying areas, at greatest risk for future flood and other damage. The city will develop micro-communities in the downtown area and on the high ground in three target neighborhoods will include vulnerable population, student housing and affordable workforce housing.

## Flood Resilient Open Space

- The city will develop a riverfront greenway linking Roosevelt Park and Oak Park, creating riparian uses, productive public space using most at-risk areas along the river, and presenting future non-flood resilient development.

## Souris River Flood Risk Reduction Alternatives Decision Tool

- Refine international water management operations to accurately forecast and manage water storage and usage.

## Support redevelopment of flood diversion and storage areas for public open space and restoration

### Foster Economic Resilience and Diversification

- Minot State University and Dakota College will program and manage a Center for Technical Education to provide training and education for areas residents and businesses to address technical job vacancies and develop workforce skills.

**Buyout Location 1:**

- 243 buyouts, 140 residential
- Approximately 28% LMI

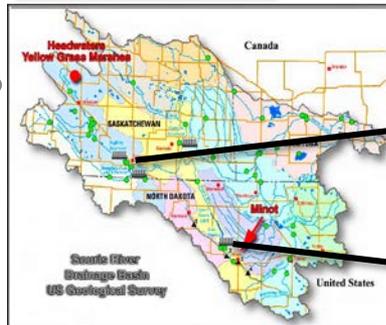

**Downtown Micro-community**

- Academic/housing facilities
- Community facilities

**Buyout Location 2:**

- 146 buyouts, 86 residential
- Approximately 60% LMI

- Reduce flood and hazardous material risk**
  - Removal of 400+ homes from the floodplain and out of the hazardous risk area.
  - Relocation of critical public infrastructure out of the hazardous risk area.
- Provide environmental and health benefits through river restoration associated with greenway development**
  - Develop 4.2 miles of navigable waterways along the river for recreational use and habitat restoration.
  - Improve social cohesion of neighborhoods along the greenway and facilitate social interaction along the river.
- Facilitate seasonal recovery of agricultural land along the entire Souris River Basin**
  - Improve the productivity of more than 50,000 acres of ranch and farm land downstream of Minot.
- Reduce economic risk for LMI families and increase economic value of neighborhoods adjacent to greenway**
  - Eliminate or significantly reduce flood insurance burden for relocated households.
  - Increase property values of neighborhoods along greenway and in areas protected from future flooding.

**Souris River (Canada)**

- Improve forecasting model
- Increase USA farm production

**Lake Darling (USA)**

- Manage risk operations
- Increase water storage

## Financing buyouts and new micro-communities

- Buy-outs:** The State of North Dakota is contributing \$90M for the property buy-out program. The City of Minot estimates a gap of \$52M for property acquisition, comparable property relocation costs and rental assistance.
- Micro-communities:** Trinity Hospital of Minot will donate \$5.5M worth of property towards the development of a downtown micro-community to facilitate economic development and revitalization. The businesses within Minot have pledged more than \$750K over the next 5 years toward the development of resilient neighborhoods. A gap of \$30M exists for the development of new housing and community center.

## Development of resilient greenway and open space

- Greenway Development:** The State of North Dakota and the City of Minot have budgeted \$25M toward the development of greenway from the zoo thru the western city boundary. The city estimates an amount of \$5M is needed to develop the initial open space within the city center.

## Fostering Economic Resilience and Diversification

- Academic facilities and student housing development:** The City of Minot will direct \$50M worth of infrastructure and transportation funds toward this effort. An estimated amount of \$15M is required to establish the initial facilities.

# Minot International Airport

- Terminal Construction
  - Construction 89% complete
  - Elevators being installed
  - Continue glass, sheetrock, electrical, plumbing, and painting, terrazzo, bag belts
- Apron and Parking Lot projects
  - Apron – Last pour Thursday then final crack sealing
- Phase II Parking
  - Started paving, continue airport road & electrical
- Airport Master Plan continues forecast and existing terminal analysis
- FedEx exterior shell complete
